The Heron™ IOS solution

A compact
and easy-to-use scanner

An intuitive software

A fully open system

The **Heron™IOS** is an intraoral scanning solution designed to increase efficiency and simplify your dental workflows. Combining intuitive software and a compact, easy-to-use scanner in a fully open system, **Heron™IOS** enables you to make the most of digital innovation, bringing the beauty of simplicity to your daily practice

An intuitive software designed for a simple, fast, and accurate dental impression, allowing clinicians to embrace the digital era with confidence.

Using the **HeronClinic™** software, your team can easily navigate the intuitive and user-friendly interface to meet all your restorative, orthodontic and implant needs. For case creation, digitization or integration, the **Heron™IOS** provides clear workflows and a dedicated cloud platform, making it easier than ever to create, digitize and consult patient cases and share with laboratories.

QUALITY MAP

Used as a complement to the scan protocol, the **Quality Map** allows users to determine if sufficient data has been acquired in key areas, enabling you to rescan target areas where more data is needed.

A compact easy-to-use scanner,
designed in Europe,
manufactured in the USA.

The **Heron™IOS** is a 3D digital imaging solution designed to simplify your work as a medical professional. Weighing only 150 grams, the **Heron™IOS** is the most ergonomic and easy-to-use scanner on the market, with a compact and streamlined design for more efficient scanning and increased patient comfort.

smallest and lightest

Heron™ IOS is fully open,
and works with all CAD/CAM
systems for clinic and lab.

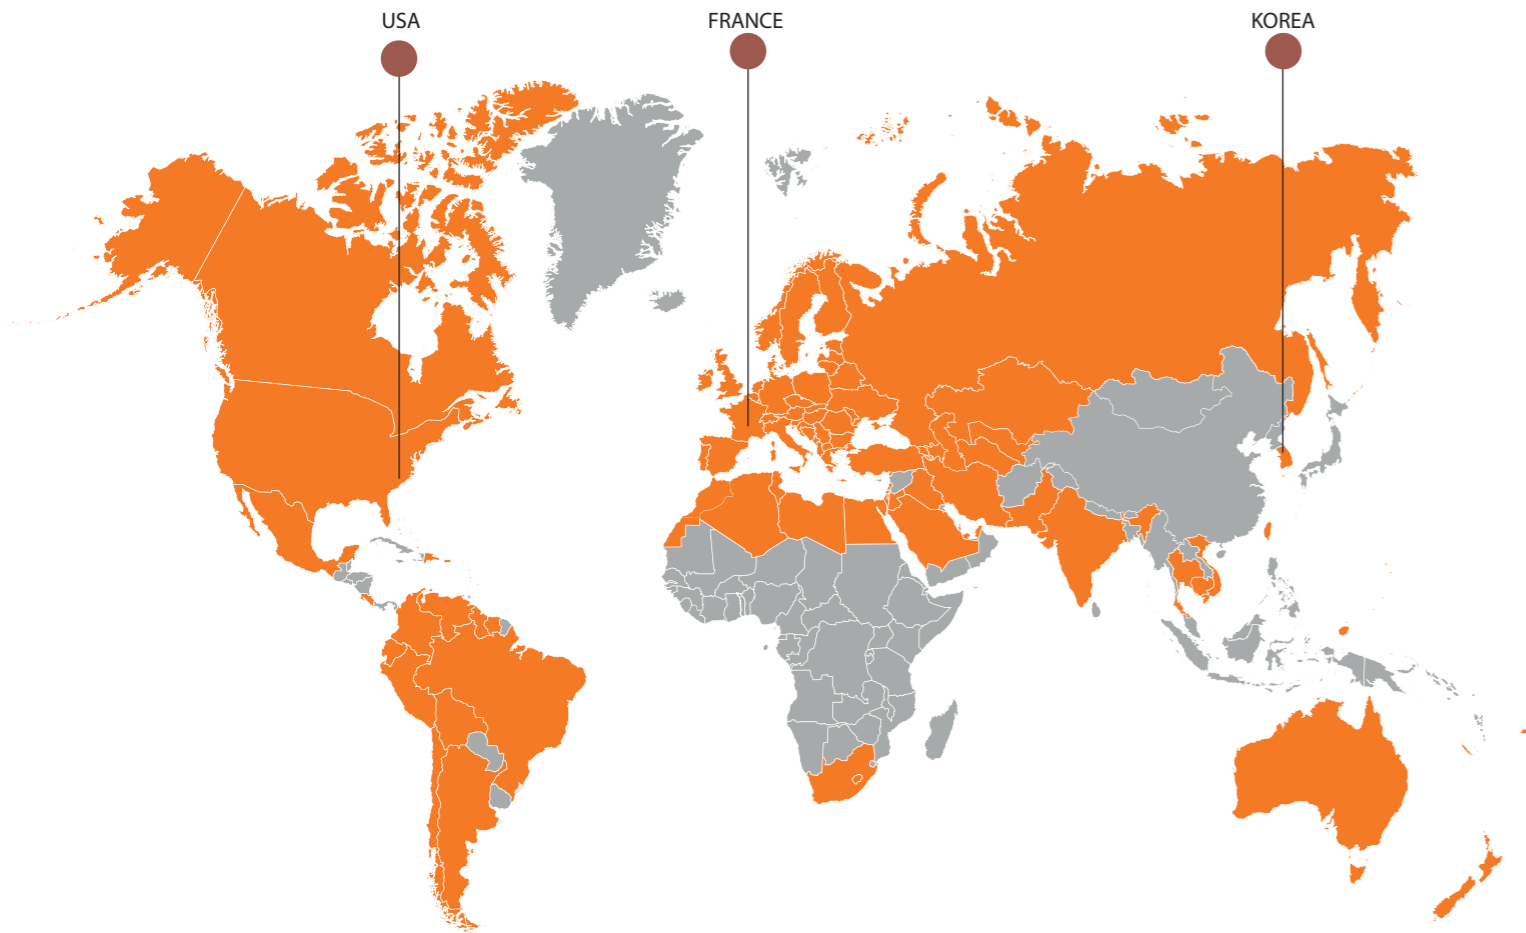

3DISC makes clinic/lab communication easy, offering export in STL, OBJ and PLY formats, direct integration with DWOS and Exocad, and simple import to open CAD/CAM systems. Providing full flexibility to exchange data with your laboratory in a single click, with the ability to export locally or via our dedicated **HeronCloud™** platform.

3DISC, innovation-based and global.

Founded in 2010, **3DISC** is a multi-disciplinary R&D team sharing the same passion: to pioneer the digital dentistry landscape of tomorrow. The fruit of 8 years of intensive development, **3DISC** introduced in 2020 its flagship fully digital 3D imaging and case sharing solution: the **Heron™IOS**. Today, **3DISC** is a privately-owned innovation-based global provider of IOS solutions, with headquarters in the United States and France.

Our international team of diverse digital experts are committed to taking digital beyond today's boundaries, to deliver relevant clinical benefits through inclusively digital solutions. When dental clinicians choose **3DISC**, they can trust our commitment to continuous innovation and to providing solutions that will help bring simplicity to their workday, empowering doctors to provide the highest quality treatment to their patients.
